

Förderung und Herstellung von Chancengleichheit zwischen Frauen und Männern in Wissenschaft und

Forschung

M.Sc. Ayse Malci

"Apart from social distancing in private life, my work life is also heavily affected by the Corona crisis, like everyone. I had to pause my experimental work in the lab and only continue with computer work at home on my own. As a PhD candidate, of course I am worried if I will be able to complete my thesis on time. Considering the measures during this outbreak, I really hope to receive a project extension to compensate these circumstances. On the side, as a foreigner, I am looking forward to visiting my family again once it's possible! "

M.Sc. Ayse Malci | PhD Leibniz-Institut für Neurobiologie Magdeburg (LIN)
